

# WHO SANK THE BOAT?

## Kids activity

Challenge: Mr Pepper's animals are stuck beside the sea without a boat.

Create a boat that will float and carry the animals safely across the bay.

Count how many animals fit in your boat before it sinks.

## Parents

Suggestion of what to use to make the boats:

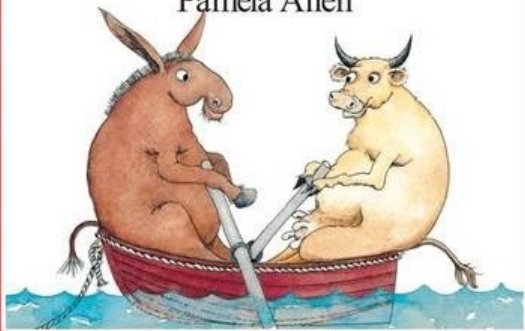

- ♦ Boxes, egg cartons, plastic containers, meat trays, sticks, straw, paper, plasticine, sticky tape
- ♦ Set up a tub of water or use your pool and some animals to add to the boat (if you don't have animals, you can use rocks, stones, marbles, etc.)

When it comes time to test the boat, ask your child/ren to predict how many animals it will take to sink their boat. Observe what happens as each animal is added. Record observations in their workbook.
