Here is an example about two boys called Sean and Sam.

Sean and Sam have both similarities and differences.

They are alike because they are both ten-year-old boys who enjoy playing football. Sean and Sam both like to go camping in the summer. They also have a similar sense of humour.

Sean and Sam are different because they have different tastes in music. Sean likes rock music and Sam likes hip-hop. Sean is happiest when he's riding his skateboard but Sam would rather ride his bike.

Now it's your turn . . .

_____ and _____ have both similarities and differences.

They are alike because they _____

_____ and _____ are different because
